WINGS Two hundred metres to target and closing

SPARKIE Looks like a lot of damage, maybe a collision with space junk?

WINGS Or perhaps a small meteorite?

OU812 Systems indicate total power failure

SKIP OU812, hook up to the mainframe computer for a damage assessment *(small laser light flickers on Sparkie)*

**SCENE 2- INTERGALACTIC COUNCIL (Full Chorus all talking randomly, lectern and gavel)**

- ODU            Order, order! (*hits gavel*) This gathering of the intergalactic Council is now under way. We are here to investigate a disturbance in the space-time continuum. Do any of you have any knowledge of this?
- EZ4U2C        Grand Master ODU, this is indeed a surprise. We Cyborgs are all just as surprised as you aren't we boys? (*Cyborgs sarcastically agree*) But a disturbance in the space-time continuum can only mean one thing. Someone has opened an intergalactic portal between two galaxies
- ALL            An intergalactic portal????
- EBONY         Yes, it's true Master Odu, boo hoo hoo, we witnessed the Alien creatures entering a black hole from the Milky Way boo hoo. (*wiping eyes*) Painful it was
- ZIGGY         Da Milky Way Jah? But dat is a protected galaxy, off limits to all aliens mon
- ODU            Yes Ziggyrockjah. It appears someone has deliberately opened a portal to the Milky Way, a protectorate galaxy with no known life forms. But why?
- EZ4U2C        Oh dear oh dear, who could have done such a thing (*sarcastically, Cyborgs all whistle and look away in guilt*). They say the Milky Way contains planets with all manner of precious resources and minerals. Perhaps this portal could work in our favour?
- EBONY         But council protocol is clear. It is forbidden to mine the resources of protectorate galaxies boo hoo hoo.

EZ4U2C True but nothing lives way out there

ZIGGY No mon, dere is one alien raace

ALL Huh??

EBONY Yes, the humans of planet Earth boo hoo

EZ4U2C Ah yes the humans. A savage and primitive race, hell-bent on destroying each other, hardly worth protecting a whole galaxy for that now is it?

ODU Council protocol is clear EZ4U2C. It is forbidden for a portal to be opened to a protectorate galaxy. Ziggyrockjah, you and your kind are the fastest movers. Proceed to the portal exit point and detain the alien Earthling invaders, then bring them here before the council for questioning.

ZIGGY Yaa wish be me commaaand Masta Odu jah, ok mon, to de portal zone

ODU Council will reconvene at the eclipse of the three moons (*hits gavel, all exit except Cyborgs*)

### **SCENE#3 CYBORGS- PLANET CYBORIA**

EZ4U2C Hehehehahahahaha. (*all Cyborgs laugh uncontrollably, EZ4U2C stops them*) Excellent, ze plan is working and ze council doesn't suspect a thing. Once ze portal has reached stabilization we will enter it and plunder ze Milky Vay

RUAQT But boss, what if they find out it was us who opened ze portal?

2BZ4U Open ze portal ze portal ze portal (*repeating is stopped when RUAQT slaps 2BZ4U on the back*)

O2B12 Plus those alien Earthlings sound dangerous! (*gleefully taps fingers together*)

EZ4U2C Nonsense O2B12, zis chance appearance of Aliens from ze Milky Vay is just ze distraction we need. Why with ze rest of ze council out searching for these intruders, we will slip through ze portal and extract all of their precious minerals with our machines. Once we have these minerals we will build the starships we need to conquer ze five galaxies and beyond

RUAQT Plus boss, we have the weapons to defeat them

2BZ4U Defeat them, defeat them, defeat them (*back slap*)

O2B12 Yeah boss, we have ze shrink ray (*pulls out shrink ray gun*)

EZ4U2C Ah yes, BRING FORWARD ZE SHRINK RAY!

ALL Shrink ray, Shrink ray, Shrink ray.....(*continue chanting until shrink ray rolls on and accidentally goes off- shrink ray sound effect and lighting, 2BZ4U is accidentally hit by the ray and disappears behind Cyborgs in small black out, a small Cyborg doll left in his place*)

RUAQT Oh no, we shrunk 2BZ4U

O2B12 Look (*picks up cyborg doll*) It's so cute, can I keep it boss, can I can I? (*high pitch speaking sound, they listen to it*)

EZ4U2C You know the rules O2B12, no pets!

RUAQT Shhhhh, I think it's trying to tell us something.... You....are...an...idiot

EZ4U2C Yes, you are an idiot, quick RUAQT, switch the shrink vray to reverse, and bring 2BZ4U back to full size, we will need all Cyborgs fully operational before ve enter ze portal (*Shrink ray sound effect, quick lighting black out, 2BZ4U reappears and doll disappears*)

2BZ4U Ze portal, ze portal, ze portal (*back slap*)

EZ4U2C Ok, zat one is good, what else do ve have?

RUAQT We also have the freeze ray boss

EZ4U2C Aaah yes, my favourite, ahhemm, BRING FORWARD ZE FREEZE RAY!

ALL Freeze ray, freeze ray, freeze ray... (*Freeze Ray blue lighting and sound effect, smoke.Freeze ray accidentally goes off freezing EZ4U2C*)

RUAQT Oh no 2BZ4U, you accidentally froze ze boss!!!

2BZ4U Ze boss, ze boss, ze boss...(back slap)

O2B12 Oh boy, he's gonna be real mad (*evil fingers*)

RUAQT Quick, unfreeze him before he/she notices

O2B12 Whoopz, just a moment, I will activate ze reverse function (*Freeze ray sound effect, lighting and smoke, EZ4U2C unfreezes*)

EZ4U2C (*coughs and splutters*) You imbecile! (*clips 2BZ4U over head*) I told you to be careful with that. How long was I out?

RUAQT Not long boss

EZ4U2C Good, now where was I?

O2B12 The portal boss (*evil fingers*)

2BZ4U Portal boss, portal boss, portal boss.....(*back slap*)

EZ4U2C Ah yes ze blessed portal, with each passing moment we move closer to stabilization. Once that is reached it will be safe to enter ze portal with our machines and plunder ze Milky Vay!

RUAQT But boss, what about the council? Won't they try to stop us

EZ4U2C Those fools at the council, let them try. If any of them give us trouble we will unleash our freeze and shrink vrays upon them, and victory will be ours

2BZ4U Be ours, be ours, be ours (*back slap, all frown at 2BZ4U*)

RUAQT And how will we find the right portal boss?

O2B12 Yeah, there's thousands of them out there

EZ4U2C We will snatch one of their crew, and steal the exact coordinates to the portal

RUAQT Brilliant plan boss

O2B12 Wonderfully evil sir (*evil fingers*)

2BZ4U Evil sir, evil sir, evil sir...(back slap)

EZ4U2C Would somebody please get 2BZ4U a new communication chip, it's starting to drive me crazy!

RUAQT Ooh boss, is it evil laugh time?

O2B12 Ooh yeah the evil laugh (*evil fingers*)

2BZ4U Evil laugh, evil laugh, evil laugh (*backslap*)

EZ4U2C Hehehhahahhohohuhuh...(*crazy laugh*)

ALL hehehahahahhohohuhuh

EZ4U2C Enough! (*stops group laughing*) We will use our superior technology and intellect to defeat them, after all we are the most powerful race in the galaxy! We cannot be defeated! Who are we?

ALL Cyborgs!

EZ4U2C Who?

ALL Cyborgs

EZ4U2C I can't hear you???

ALL Cyyyyyboooorrrggsss!!!

#### **SONG#4 "CYBORGS"**

*Cyborgs, we have power and strength we lead the way  
 Cyborgs, our efficiency always wins the day  
 With our mental strength and our physique too  
 Make short work of dirty jobs to do  
 Metal shiny, a race supreme, cannot stop us the mean machine*

EZ4U2C The Cyborg race has dominated the cosmos for thousands upon thousands of years. No one can halt our power and ruthless domination..hahahaha...

Cyborg  
 Chorus: *Cyborgs, we have power and strength we lead the way  
 Cyborgs, our efficiency always wins the day  
 With our mental strength and our physique too  
 Make short work of dirty jobs to do  
 Metal shiny, a race supreme, cannot stop us the mean machine*

EZ4U2C Our high performance machinery is awesome of course. But it requires the best of resources from around the universe. Sometimes we have to help ourselves, sorry! Hahahaha....

CHORUS: *Not quite human, not all machine  
 We're the meanest when working as a team*

*Set a challenge, we'll see it through, do not stop us, we are braver than you*

- EZ4U2C *The Cyborg needs to plunder, to feed our machines' raw power  
Clueless Earthlings, rich resources, drive powerful forces  
Steal your water like lambs to the slaughter  
We'll come take what you've got. We'll find that wormhole  
We'll plunder Earth. So the Milky Way's protected PAH!  
Only Cyborgs know what the Earth is truly worth. Cyborgs want power!*
- EZ4U2C Oh yes we're nasty alright. Cyborgs show zem!
- CYBORG *Cyborgs, we have power and strength we lead the way  
Cyborgs, our efficiency always wins the day  
With our mental strength and our physique too  
Make short work of dirty jobs to do  
Metal shiny, a race supreme, cannot stop us the mean machine*
- Cyborgs, we have power and strength we lead the way  
Cyborgs, our efficiency always wins the day  
Cyborg power!*
- O2B12 Boss, what about these alien Earthlings in the portal?
- RUAQT Yeah, they sound pretty dangerous boss!
- 2BZ4U Dangerous, dangerous, dangerous...*(back slap)*
- EZ4U2C Ah yes, ze Earthlings. They may come in handy after all. We will intercept one of their crew and interrogate them. They may have valuable information about ze Milky Vay
- RUAQT But Boss, what if they refuse to talk?
- EZ4U2C Well then, I'm afraid it's the shrink ray for them
- O2B12 Evil laugh time Boss?
- RUAQT Ooh please let it be evil laugh time? *(evil fingers)*
- 2BZ4U Laugh time, laugh time, laugh time *(back slap)*
- EZ4U2C Wait for it! Hehehehehehehe
- ALL Hehhheheheheheheh

EZ4U2C        Silence!!! Move our ships to ze portal zone, once the Earthlings exit you will snatch the leader and bring them to me! Hehehehahahahhuhuhu

ALL            Hahahahahhahah.....(*Cyborgs exit laughing madly*)

- SKIP Not likely Sparkie, there ain't much of anything out here except dark and rocks *(Ebony sneaks up behind them sobbing)*
- EBONY Mmmh boo hoo *(sobbing)*..... Excuse me

- EBONY Yes, sniff sniff, and you're right in the middle of a huge one Boo hoo hoo....
- WINGS Black hole you say, that would explain these crazy readings
- SPARKIE And the strange lights
- CREW Huh? *(all look at Sparkie)*

EBONY            You are now trapped in a space-time continuum boo hoo, there is only one way out of here.

BLACK HOLES    Through us! (*crying and weeping, crew console them*)

CREW            Through you?

EBONY            Yes, (*sob sob*) there is no going back (*boo hoo*)

OU812           It is true sir, computers indicate it is impossible to turn around once inside a black hole

SKIP            So perhaps we really are destined to be lost in space?

WINGS           Hey, why are you guys so sad?

SPARKIE        Yeah, did you have a bad day or something?

SQUISH          Well....it's painful being a black hole

CRUSH           Yeah, all that twisting and turning (*all agree*)

SPLAT           Squeezing and Squashing

SQUISH          Not to mention the time loss

BLACK HOLES   Boo hoo! (*all agree while sobbing along*)

CRUSH           The gravity always bringing you down (*sobbing*)

SPLAT           The light speed zipping right through you (*boo hoo*)

SQUISH          And the time continuum messing with our beauty sleep (*whaaaa..*)

CRUSH           People always crashing into us

SPLAT           Passing right through us

CRUSH           Bending and twisting us

EBONY           It's not easy being a black hole. There's so much expectation. It's hard to live up to the reputation, it's not easy when you spend half your life stuck between two galaxies, it's downright painful, it's no wonder we're bruised black and blue aaaaawwwwww boohoooo

**SONG#6 "BLACK HOLE BLUES & BOOGIE" – Black Holes**

*We're dark and black with a shade of blue  
 We might seem cute but our friends are few  
 Got us gravity and with awesome force  
 We'll suck you in we'll be sad of course  
 We'll annoy you we could destroy you  
 When a star collapses Black Holes, we're black and blue*

*Our job may seem really glamorous (Oh, we're full of misery)  
 But we don't like when you make a fuss  
 When you twist and turn turning upside down (Down and glum, depressed are we)  
 You can be sure it will make us frown  
 Our complaining can be quite draining  
 When a star collapses Black Holes, we're black and blue*

SPARKIE How can you be so miserable? It's beautiful out here; so isolated and magical.  
 Hey, I've got an idea. Let's pick up the pace and put a smile on those black and  
 blue faces. Watch us. You'll get the hang of it. Come on!

CREW *Black Hole boogie, Black Hole boogie  
 Black Hole boogie, Black Hole boogie  
 Can't resist you, know we'd miss you, Black Hole boogie*

ALL *Black Hole boogie, (Whatta ya say?) Black Hole boogie (comin' your way)  
 Black Hole boogie, (Whatta ya say?) Black Hole boogie (comin' your way)  
 Can't resist you, know we'd miss you, Black hole boogie*

**SPOKEN-** You can't shake us, never 'scape us

ALL *Black Hole boogie, (Whatta ya say?) Black Hole boogie (comin' your way)  
 Black Hole boogie, (Whatta ya say?) Black Hole boogie (comin' your way)  
 Can't resist us, know you'd miss us, Black Hole boogie  
 You can't shake us, never escape us, Black Hole boogie*

*(REPEAT CHORUS)*

**SPOKEN-** You can't shake us, never 'scape us

*Black Hole Boogie. Hey!*

EBONY All this positivity is getting me down (*Boo Hoo*)

SPLAT Yeah, who asked you guys to come in here and cheer us up?

SQUISH Things were going along just nicely till you arrived

CRUSH Looks like just another thing to bring us down *(all agree and cry)*

WINGS Ok then? So how long will we be in this black hole?

EBONY Nobody knows for sure, boo-hoo. There's no time in here

SPLAT You could be travelling for centuries, or arrive five years before you left

SQUISH You can forget about your families, chances are they're either dead or haven't been born yet

CRUSH Best take a seat and enjoy the ride, oh and try not to get bashed and bruised, it's a little on the dangerous side boohoo hoo. *(Black holes back into formation Crew settle down for sleep, starlight appears again on Sparkie)*

WINGS Do you mean to say we could miss the rest of our lives in here, or arrive back at the time of the dinosaurs?

OU812 Computer calculates that the chances of exiting a black hole at precisely the time you enter are 10 to the power of 4578900000....*(cut off by Sparkie)*

SPARKIE Alright, but what's really out there?

EBONY Out where? *(boo hoo)*

SPARKIE Out there, beyond all that darkness *(points above audience)*

EBONY Why the shooting stars of course

SPARKIE The shooting stars?

SPLAT The ancient ones

SQUISH Them that made the universe

CRUSH The lights in the darkness

SPARKIE Shooting Stars? Sounds mysterious

SKIP Come on Sparkie, forget about all this shooting star stuff and get some rest. Like the Black Holes said, this could be a long ride *(Crew settle down for sleep, star light appears again on Sparkie)*

**SONG#7 STARLIGHT**

SPARKIE That's just it Skip, I can't stop thinking about what's out there. All that endless space, what if this whole Black Hole thing was written in the stars, meant to be?.....Hey look!.... There's that strange light again!

SKIP Light?... What light?... I don't see nuthin

SPARKIE Right there! I'm gonna follow it (*Skip shrugs shoulders and goes to sleep*)

*Sparkie-Somewhere, deep in the night, I hear a voice, calling my name  
Somewhere, faster than light, shining so bright, burning like flame  
Somewhere, voices so near, loud and so clear, urging me on  
Somewhere, across the night, beyond all sight, calling me home*

*Star shining bright, shine on me tonight  
And lead me from the darkness to the light  
Star shining bright, save me from my plight  
And guide my way back home in your starlight*

STAR Sparkie, Sparkie?

SPARKIE Who's there?

STAR It's me, your shooting star

SPARKIE Wait, I have a shooting star?

STAR Of course, everyone has a guiding light, listen

*Star- Somewhere, deep in your mind, I am the voice, calling your name  
Somewhere, beyond all sight, deep in the night, burning like flame  
Somewhere, I am your guide, lighting your path, leading the way  
Somewhere, across the night, burning so bright, calling you home*

*Sparkie- Star shining bright, shine on me tonight  
Star- Gaze into the light I will guide your way  
Sparkie- And lead me from the darkness to the light  
Star- Call my name and I'll be there  
Sparkie- Star shining bright, save me from my plight  
Star- Gaze into the light All your dreams come true  
Sparkie- And guide my way back home in your starlight, starlight  
Star- In your starlight, starlight  
Sparkie- Guide my way back home in your starlight..... star.....light  
Star- Dreams come true starlight.....star.....light*

SPARKIE So you're the strange light I've been seeing out here

STAR Yes Sparkie, I'm your shooting star and I've been watching you all your life.

SPARKIE My shooting star?

STAR When you were eight years old, you were gazing up at the sky one night and I shot right across it. Do you remember?

SPARKIE Yes, I remember, summer holidays at my Aunt Ethel's Farm. You were watching me then?

STAR Yes Sparkie, and from that moment we were connected, you and I. From that moment I've been watching over you, guiding you, lighting your path

SPARKIE My path, But how will I know which way to go, which way to turn?

STAR Your path was written in the stars Sparkie, from before your birth. Keep following the light and you will find your true destiny (*Stars begin to exit*)

SPARKIE Wait, come back.....how will I know my path, my true destiny?(*Crew and Black Holes begin to wake up*)

STAR Follow the light Sparkie, follooooww theee lllllllllight (*Black holes begin to squeeze around crew*)

SKIP Something's happening

OU812 The current readings are off the charts sir

EBONY Oh no, looks like you're about to pop out boo hoo

WINGS Pop out where?

SQUISH Nobody knows for sure boo hoo

CRUSH Let's hope your oxygen holds out boo hoo

SPLAT Oh this is gonna hurt (*black out and black hole sound effects, Rastaroids enter and assume ball position*)

EBONY Hold on here you go!!!!!! (*Black hole sound effect, Black holes exit as Rastaroids enter curling into balls on stage*)

CREW           Whooooaaaaahhhhhhh!!!!!!

WINGS          Systems show we have exited the Black hole sir, but we are no longer in the Milky Way

SKIP           Not in the Milky Way? OU812..systems report

OU812          Yes sir, this is the Galaxy Andromeda

CREW           Andromeda?

OU812          Yes sir, 40,000 light-years from Earth

CREW           40,000 light years!?!?

WINGS          According to company star charts, Andromeda is the closest Galaxy to the Milky Way, but still 40,000 light years from Earth

SPARKIE       Skip, there's something I gotta tell you, the strange lights....they...

SKIP           Not now Sparkie, we're lost in space, and it looks like we won't be seeing Earth anytime soon.

SPARKIE       But I saw something, a light inside the black hole

SKIP           Enough! You must have hit your head. We need a plan and we need it fast, Wings, do you have our precise location?

WINGS          There's no way of knowing just how long we were inside the black hole sir, or how far we travelled. Right OU812?

OU812          Yes sir, time and space have no relevance inside a black hole

SKIP           Great, just great, lost in outer space without any hope of a rescue

WINGS          Hey what's this stuff (*feeling a curled up Rastaroid*)

SKIP           Feels hard whatever it is (*sits on top of one*)

SPARKIE       It is hard, like some kind of rock-like substance

OU812 Computer indicates igneous and metamorphic geology

SPARKIE Rocks, floating out here in space?

WINGS Looks like we've exited the black hole right into some kind of asteroid field.

Ok everybody, Rastaroids set ye course for planet Andromeeda, standby for de grav-itation-al pull, countdown 3,2,1 (*Gravity Sound effect, OU812 and Cyborgs 1,2,3 intercept Skip and Stone and pull them off stage - enter chorus for Act 1 Finale*)

**SONG#9 "GRAVITY"- Full Chorus**

*Spinning round, forces turning us upside down  
 Pulling us far away from home  
 Blaze across the endless night  
 Breaking through the speed of light*

*Feeling gravity, pushing down on you  
 Pushing down on me, try to make it through  
 Feeling gravity, pushing down on you  
 Pushing down on me, try to make it through  
 But when gravity gets the best of me  
 Gravity will guide us home  
 Spinning round, planets orbiting all around*

*Flying across the universe  
Blaze across the endless night  
Breaking through the speed of light*

*Feeling gravity, pushing down on you  
Pushing down on me, try to make it through  
Feeling gravity, pushing down on you  
Pushing down on me, try to make it through  
But when gravity gets the best of me, Gravity*

*Feeling gravity, pushing down on you  
Pushing down on me, try to make it through  
Feeling gravity, pushing down on you  
Pushing down on me, try to make it through  
But when gravity comes and rescues me  
Gravity will guide us, gravity will guide us  
Feeling gravity*
